ENSE871: Usability Engineering

Dr. Tim Requests and Desires:

1. **Scraping Research Papers:**

   Dr. Tim suggests keeping it simple by only scraping papers from registered users, rather than scraping all papers.

2. **Bilingual Support and Adding Research Papers:**

   Dr. Tim recommends looking into plugins for bilingual support and suggests exploring ways for users to add their own research papers from other sites.

3. **Website Functionality:**

   Tim points out issues with the login feature and suggests fixing it. He also mentions the need to adjust the size of text on the homepage and advises on making improvements to image sizes.

4. **Additional Features:**

   Dr. Tim suggests adding features like searching papers by keywords or author, and filtering papers by publication year.

5. **Overall Progress:**

   Dr. Tim acknowledges the progress made and encourages the team to continue cleaning up and refining the website.
